

Account Security & Password Reset Guide

This document provides detailed guidelines for password recovery, two-factor authentication configuration, and standard account security policies at Adsparkx Cloud Services.

1. Password Reset Steps

If you have forgotten your password or are locked out of your account, follow these exact steps to restore access:

- **Step 1:** Navigate to the login portal and click the 'Forgot Password' link.
- **Step 2:** Enter your registered email address and submit the form.
- **Step 3:** Check your inbox for a password reset email sent from *no-reply@adsparkx.com*. (Check spam/junk folders if not received within 2 minutes).
- **Step 4:** Click the secure reset link inside the email. The link is time-sensitive and expires exactly **15 minutes** after creation.
- **Step 5:** Choose a new secure password that meets our corporate security requirements.

2. Password Strength Requirements

To ensure the safety of your cloud environment, your new password must comply with the following standards:

- Must be at least **12 characters** in length.
- Must contain at least one uppercase letter (A-Z).
- Must contain at least one lowercase letter (a-z).
- Must contain at least one numerical digit (0-9).
- Must contain at least one special character (e.g., !, @, #, \$, %, ^, &, *).

3. Multi-Factor Authentication (MFA)

We strongly recommend enabling MFA to protect your account. Go to Profile Settings > Security and scan the QR code with an authenticator app (such as Google Authenticator, Microsoft Authenticator, or Authy) to link it.

If you lose your MFA device, you must enter one of the 8-digit Recovery Codes provided during MFA initialization. If you do not have your recovery codes, you must contact support to initiate identity verification.
